

Preparing Material

The quantities in the diagram below describe production of material as a worst case for one job site. The total annual import quantity reported as 1000 kilos assumes 500 jobs.

- A. Material is delivered in up to 10 kilo aluminum containers from the supplier as a liquid
- 1. Up to 2 kilos of LVE substance is transferred into a suitable container by Tracerco staff.
- 2. The material is sealed into a suitable container with capacity of up to 5 liters.
